

# REMOTE PATIENT MONITORING (RPM)

Sequoia Integrative Medical Services provides Remote Patient Monitoring (RPM) that allows for vital health data to be collected & reviewed by the clinical team to support partner facilities with timely interventions & improve patient outcomes.

## OVERVIEW

- Caregivers record patient vital signs using Sequoia-provided devices from their facility.
- RPM data is reviewed daily by the Sequoia team for trends & early warning signs.
- Facilities benefit from reduced workload, improved efficiency, & faster response times.
- RPM integrates seamlessly with the patient's electronic medical record (EMR).

## BENEFITS

- Continuous health monitoring
- Early identification of clinical concerns
- Reduced facility staff burden
- Improved patient engagement & adherence
- Clinical oversight by Sequoia

## CARE TEAM

### TAYLOR P, RPM COORDINATOR

Coordinates RPM workflow, data monitoring, & communication between patients, facilities, & providers.

### SADIE S, RPM SPECIALIST

Supports patient monitoring, outreach, & continuity of care throughout the RPM Program.

### KIM R, RPM SPECIALIST

Supports patient monitoring, outreach, & continuity of care throughout the RPM Program.
