I have been in the medical assisting field for five years, with additional experience in healthcare working in long-term care facilities. I attended

Rasmussen University, where I developed a strong foundation in clinical skills and patient care. I am committed to delivering quality care and being a dependable support to both patients and healthcare teams.

Outside of work, I enjoy spending time with my family. As a busy mom of three children, family life is very important to me. Faith plays a meaningful role in our lives and helps us stay grounded. My family and I enjoy outdoor activities like bike rides and family vacations. Fall is my favorite season, and I enjoy photography, especially capturing nature's beauty. I am passionate about professional growth and finding balance between my career, purpose, and personal values.
