My name is Anna and I have been an RN since 2023. I have had my CNA license since 2019. I have substantial experience with inpatient psychiatry and psychology as well as experience working on a cardiology/ PCU floor. I obtained my BSN from Chamberlain university in 2025 and am continuing my education with Chamberlain to become a psychiatric nurse practitioner. I have a passion for giving my patients the tools and education to advocate for their wellness and health and strive to build my nursing practice around empathy and understanding.

When not at work, you can find me, my 3 children aged 14, 12, and 10, and my husband to be at all the youth extracurriculars and sporting events imaginable. When our time is not taken over by youth events, we are kayaking, hiking, or camping. I am excited to join this team and to provide top-quality healthcare to you and your family.
