

REMOTE PATIENT MONITORING

RPM data helps with timely interventions & improve patient outcomes

OVERVIEW

Sequoia provides RPM that allows for vital health data to be collected & reviewed by the clinical team to support partner facilities with timely interventions & improve patient outcomes. Caregivers record patient vital signs using Sequoia-provided devices from their facility. RPM data is reviewed daily by the Sequoia team, and integrates seamlessly with the patient's electronic medical record (EMR).

BENEFITS FOR PATIENTS, FACILITIES & FAMILIES

- ✓ Improved chronic disease management for diabetes/hypertension
- ✓ In-Real-Time readings for timely insights into patient health
- ✓ Continuous health monitoring for timely interventions
- ✓ Easy to use collection of data
- ✓ Integration into your EMR System (ECP & PCC)
- ✓ Reduced ER visits & hospitalizations
- ✓ Reduced workload through automated data collection

TECHNOLOGY OVERVIEW

- ✓ Secure patient dashboard with data analytics & trend visualization
- ✓ HIPAA-compliant storage
- ✓ Tech onboarding education for staff, 24/7 support for patients
- ✓ Bluetooth-enabled glucose meters & bluetooth-enabled blood pressure monitors
- ✓ Tablet with Wellness Metrics dashboard for bluetooth readings to sync
