Hi, my name is Melinda. I have been an RN since 2006. I began my career in healthcare as a senior in high school with completion of my CNA certification. I proceeded to obtain my ADN at Milwaukee Area Technical College, followed by my BSN through Chamberlain University. My professional experiences span from bedside care to leadership roles. I take a holistic, patient-centered approach to providing care. My professional experiences include adult and geriatric populations in a variety of settings with acute and chronic conditions, TBI, inpatient mental health services and hospice care. Providing patient and family education to assist them in best practice management of their health is my passion.

Outside of my professional life, I enjoy spending time with friends and family, traveling, time in the gym and time out in nature.
