Paige has been in the medical field since she was 16. She earned her nursing degree from Northeastern Wisconsin Technical College. Her role includes daily triaging of patient needs, monitoring treatment, and providing patient medical care. Believing we all need an advocate in life and in health, Paige does her job with great care and attention. She has specific experience with dementia and Alzheimer's, as well as a passion for psychiatric care/mental health for all ages.

Paige spends her free time roller-skating on the state trails and enjoys spending time at her family cabin in northern Michigan. She uses her passion for science and health to further improve her body and mind. She is also a natural comedian and always provides a refreshing reminder of just how important it is to laugh!
