Hi, I'm Kenzie! I am an RN and earned my BSN from Viterbo University in 2023. I bring several years of healthcare experience across a variety of specialties, including neurosciences, behavioral health, pediatrics, geriatrics, and medical surgical nursing.

For over two years, I have worked as an inpatient neuroscience nurse, an experience that has strengthened my clinical knowledge, critical-thinking skills, and passion for providing compassionate, patient-centered care during some of the most challenging times in my patients' lives. I am excited to join the Sequoia team and expand my nursing experience beyond the hospital setting into assisted living facilities. Caring for the aging population has always held a special place in my heart, and I am passionate about being a source of support for both my patients and their families. To me, nursing is about more than providing medical care, it is about getting to know each person as an individual, listening to their needs, advocating for their well-being, and being there for them and their families through every step of their journey.

Outside of work, I enjoy discovering new restaurants (especially ones with live music), traveling with my family and friends, thrifting, and spending time at home with my two cats, Auggie and Rudy. I look forward to getting to know everyone and hope to make a positive and meaningful impact within the team and the lives of those I have the privilege of caring for.
